Re: The SlateSaver System

Dear Mr. Ward:

Please accept this letter as an expression of the sincere thanks my wife and I have for the recent project you completed on our house involving the installation of the SlateSaver System on our sixty-plus year old slate roof, the installation of a ridge vent and insulation in our attic, and the repair of the crown of our chimney. Jean and I are most satisfied with the product and services we received and with our entire experience in dealing with you and your company.

Please feel free to use this letter as a recommendation to other customers, and do not hesitate to have anyone thinking about retaining your services contact us for a reference.

When Jean and I concluded that we needed a new roof we began to investigate the replacement of our slate roof with a new slate roof, slate material alternatives, or asphalt. Because the cost of installing a new slate roof was prohibitive, and we were not satisfied with the aesthetics, lifespan or durability of an asphalt roof, we were therefore left with investigating alternatives to either of those options. My wife first learned of SlateSavers while reviewing your Web site. We contacted you and shortly thereafter you came to our home and explained to us in very thorough and easily understood terms the SlateSaver System and process, its advantages from a cost, durability and longevity perspective over either installing a new roof, using a slate material alternative or installing an asphalt roof. Because Jean and I like the look and durability of slate and wanted to retain the architectural integrity of our home, we decided to research further the SlateSaver System. We contacted several references and inspected various jobs you performed on residential houses and the project you did at the Sheppard Enoch Pratt Hospital. We decided that the SlateSaver System seemed to be our best alternative.

By the end of the first day of the project, we felt very good about our decision. You and your crew were extremely efficient, unobtrusive and professional. Work proceeded at an orderly pace. There were no delays, cost overruns, change orders, or hidden costs. The job went exactly as you said it would. We were also very impressed and happy with the condition of our house and yard at the end of every day. I have had many contractors work on my house and I cannot recall any one of them ever cleaning the house and the yard as well as your crew did at the end of each day.

I am quite sure that my two year old son and six month old puppy got in your way many times. My wife and I greatly appreciated how you and your crew were very friendly to them, always ensured their safety, and worked in a way that did not interrupt their nap and play schedules. I am quite sure that they bothered you more than you bothered them.

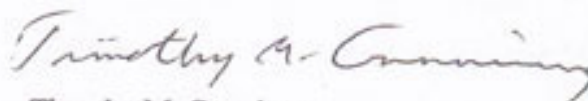

After the project was completed, the result was absolutely magnificent. The slate roof itself looked wonderful and the copper gutter, ridges, flashing and points you put in look absolutely fantastic. Your work is of the highest quality. Since the completion of the project, we have had many family members, friends and neighbors compliment the work you did and inquire about the process, your company and the SlateSaver Sytem.

Jean and I also are very comforted by the expansive fifteen year warranty you placed on your work. Not many people or companies stand behind their work in that manner anymore. We appreciate that you and your company do so. Fifteen years if the longest warranty I have ever heard of for work done on restoring a roof, particularly one as old as ours.

The true test of whether one is satisfied with the services and product they have received is, of course, to ask them whether they would do it all over again knowing what they know now on the back end of the job. Our unequivocal answer is yes, we would. Not only would we are completely satisfied customers and glowingly recommend you and your company to anyone considering the SlateSaver System or and/or obtaining your services.

Thank you again for a great job and a pleasant experience. Jean, Jack and I wish you and your entire company all the best in all of your future endeavors.

Sincerely,

Timothy M. Gunning
